Method

- char * keys
- ProcessIndicator process _indicators
- + static bool if_size _is_valid(const int &size_of_message)

Transposition::Griding

- bool grid
- ProcessIndicator process indicators
- + Griding(const ProcessIndicator &pi_1, const ProcessIndicator &pi_2)
- + String crypto(const String &message_to _be_crypto)
- + static void debug()

Transposition::Inversion

- + Inversion()=default
- + String crypto(const String &message_to be crypto)
- + String decrypto(const String &message_to_be _decrypto)
- + static void debug()
